

How Memento works

A small device that holds private notes — and quietly passes them to the right person, only when the time is right. Follow the two paths below: **the owner** and **a trusted person**.

- OFFLINE
- ENCRYPTED
- NO CLOUD
- NO ACCOUNT
- ONE DEVICE

01 — SETUP

The owner prepares the device

1 Unlock & open config

On first use, enter the default PIN *123* and choose *WiFi Upload & Config* from the menu.

2 Join its private Wi-Fi

The device starts its own Wi-Fi and shows how to connect. Join it and open the page in any browser.

3 Set everything up

Change the master PIN, add trusted people with their wait times, and write your private notes.

The device hosts the page itself — no app, no internet.

02 — DAY TO DAY TWO PATHS BEGIN

THE OWNER

Uses it whenever they like

- Enters the master PIN **any time they want** — to read or add notes, add people, or change settings.
- No routine to keep — there are **no check-ins to remember**. The device asks nothing day to day.

A TRUSTED PERSON

Waits, holding a PIN

- Has their own **alternative PIN**, given to them by the owner.
- For now it opens **nothing** — the notes stay sealed.

THEN, ONE DAY...

03 — THE TRIGGER

The trusted person enters their PIN

That starts a **release countdown** — a waiting period the owner set in advance. The screen now shows the time remaining.

Spouse · 3 days

Lawyer · 1 month

PAUSE Lose power and the clock simply **pauses**. The countdown never resets and never completes early — it only runs while the device is on.

YES — THE OWNER STEPS IN

NO — SILENCE

THE OWNER IS ACTIVE

The release is cancelled

Entering the master PIN even once **stops the countdown**. Nothing is released.

Nothing ever opens while you're still looking after it.

↳ BACK TO DAY TO DAY

NO CHECK-IN ARRIVES

The notes are released

- The countdown completes and the device shows "Access Ready".
- The trusted person re-enters their PIN.
- They read **only the notes assigned to them** — nothing else on the device.

THE WHOLE IDEA

Locked by you, opened by time.
